CLEMATIS
Nelly Moser
\$1.50 each

VINES are among the most adaptable of plants. They can be used effectively to screen unsightly areas. In foliage and in flower, they lend a softness to the severe architectural lines of porches, pergolas, and trellises. Often they can be planted near walls or old tree stumps to add a decorative note.

If you wish to plant rapid-growing vines, choose any variety of Ampelopsis or Dutchman's-pipe, or Trumpet Creeper. Wisteria and Silver Lace Vine are also rampant growers and will cover a large area in a short time. If you want delicate tracery against a wall, use English Ivy. The various forms of Honey-suckle contribute a brilliant note of color. Euonymus is particularly useful for wall treatment.

Ornamental Vines postpaid if included with an order for Clematis East of Mississippi River

POLYGONUM AUBERTI
Silver Lace Vine

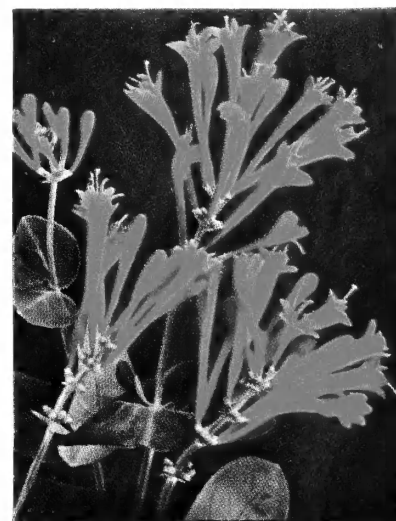

Ampelopsis aconitifolia. Monksblood Vine . . .	\$0 35
Ampelopsis heterophylla. Porcelain Ampelopsis . . .	35

LADY CAROLINE NEVILLE. \$1.50 each

THE PRESIDENT. \$1.50 each

PRINS HENDRIK. \$1.50 each

VILLE DE LYON. \$1 each

9 NEW CLEMATIS *Presented in Color for the First Time*

POSTPAID EAST OF THE MISSISSIPPI

It is with great satisfaction that we present to garden makers, and particularly to Clematis enthusiasts, these new portraits of the hybrid Clematis, the aristocrat of climbing plants. It was not so many years ago that the late Ernest Wilson bemoaned the fact that it was almost impossible to obtain any great number of Clematis varieties in this country. We are glad to have had a part in helping to re-introduce and to popularize these exquisite flowers.

Let us remind you that the Clematis hybrids can be used in

many ways in your garden. First of all, provide shade for the roots and lower stems of the plants and tie the stems securely to some stationary support so that the crown will not be injured. Many of the Clematis hybrids can be used to adorn a wall. If you are fortunate enough to have a gateway or a trellis, why not plant some Clematis on either side? Uninteresting garage walls can be made attractive with the use of trellises which provide effective supports for your Clematis plants.

JAMES I. GEORGE & SON, *Clematis Grower*, Fairport, N.Y.
